

About NIA

Noida International Airport is the upcoming greenfield airport at Jewar, which will enhance connectivity to and from Delhi NCR, Noida, and Western UP. The foundation stone for the grand inauguration of NIA was laid on November 25, 2021, by Prime Minister Narendra Modi and the first phase of the airport will be completed by the end of 2024, with one terminal and one runway. NIA, a confluence of Swiss efficiency and Indian hospitality, is envisioned to become India's leading airport in terms of customer service, outstanding efficiency, digital services, and commitment to minimal environmental impact.

Construction Update

Excavation works at the Project site have begun after onboarding Tata Projects as the EPC contractor.

News Updates

NIA selects Siemens VarioTray baggage handling system

Noida International Airport (NIA) signed an agreement with Siemens Logistics India Private Limited. Under the agreement, Siemens will design, supply, install, commission, operate, and maintain the departure and arrival baggage handling system for Noida International Airport. The Siemens VarioTray system is a modular and expandable technology. It will provide fast and safe transportation of baggage with high level of accuracy. This will be a fully automated system with a high level of precision, ensuring that each bag is tracked along its route with live security status. The technology will integrate seamlessly with NIA's operations and provide fast baggage handling. Owing to its design and configuration, it will also assure reliable and energy-efficient transportation of bags. [Read more](#)
